Projects

Web development - EDUCHAT October 2021 - January 2022

- Initiated as a trial project for learning to learn new resources.
- Explored a new website builder platform named Bootstrap studio and started the front end as a template.

Web development - AGRICONNECT June 2022 - August 2022

- A full stack experience of building a full-fledged application.
- Learned new libraries and initialized a payment gateway for the application using Stripe provider.

Mobile App Development - K-FIT, Kalasalingam University July 2022

- Gained an additional team-based project which made me enthusiastic to build and think great.
- K-Fit is a Health Monitoring application produced because of dedication and teamwork.

Web development - other experiences

- Self educated and more interested in react library and MERN as a stack for full stack.
- Built many frontend clones with my interest.
- Made IEEE student branch website for our institute and symposium website.

Skills
